AUSAD CREATIVES

30 SHORT-FORM VIDEO SCRIPTS

Ready-to-adapt scripts, visual directions and calls to action for creators building an audience with useful content.

CREATOR GROWTH KIT · ASSET 05

6 script categories · 30 complete scripts · production notes · CTAs

How to use these scripts

These are adaptable frameworks, not lines to recite mechanically. Replace every bracketed field with your real topic, experience, tool or offer. Keep the language natural to your voice and make sure the finished video delivers what the opening promises.

A simple recording workflow

1. Prepare: choose one audience and one outcome. **2. Personalise:** add a specific example, proof or demonstration. **3. Record:** capture the hook separately, then record the body in short sections. **4. Edit:** remove dead space, add readable captions and relevant visuals. **5. Review:** check accuracy, sound, pacing and the CTA before publishing.

Timing guide

The durations are starting estimates, not strict platform rules. Speak clearly at your natural pace. If a script feels rushed, remove secondary details or split the lesson into a series rather than speaking faster.

The 30 scripts

EDUCATIONAL EXPLAINERS

SCRIPT 01 · Make it simple

Suggested length: 35–45 sec **Purpose:** Explain one difficult concept with a familiar analogy.

SPOKEN SCRIPT

Let me make [topic] simple. Think of it like [everyday analogy]. The key idea is [principle]. For example, [practical example]. So remember this: [one-line takeaway].

VISUAL / EDITING DIRECTION

Open on camera; show the term, analogy and example as separate overlays.

CTA

Save this for the next time you need to explain [topic].

SCRIPT 02 · Three things to know

Suggested length: 30–40 sec **Purpose:** Give beginners a concise overview.

SPOKEN SCRIPT

Before you start [task], understand these three things. First, [point one] because [reason]. Second, [point two] helps you [benefit]. Third, [point three] is often overlooked. Start with [first action].

VISUAL / EDITING DIRECTION

Number each point on screen; use a cut between points.

CTA

Which point was new to you?

SCRIPT 03 · Mistake and correction

Suggested length: 30–45 sec **Purpose:** Correct a common mistake constructively.

SPOKEN SCRIPT

If you are learning [topic], watch out for [mistake]. It can lead to [consequence]. A better approach is [correction]. Here is a quick example: [example]. Practise this one improvement first.

VISUAL / EDITING DIRECTION

Show the mistake briefly, then demonstrate the improved version.

CTA

Save this reminder for your next practice session.

SCRIPT 04 · Step-by-step walkthrough

Suggested length: 45–60 sec **Purpose:** Teach a repeatable process.

SPOKEN SCRIPT

Here is how I [complete task] in four steps. One: [action]. Two: [action]. Three: [action]. Four: [action]. The detail that matters most is [note]. Try it with [practice task].

VISUAL / EDITING DIRECTION

Screen-record the process; keep each step visible and readable.

CTA

Follow for more practical walkthroughs.

SCRIPT 05 · Explain a term

Suggested length: 30–45 sec **Purpose:** Define a term or acronym in plain language.

SPOKEN SCRIPT

Today's term is [term]. It means [simple definition]. You will see it when [context]. For example, [example]. It differs from [related term] because [distinction]. That is [term] in simple language.

VISUAL / EDITING DIRECTION

Display term, definition, context and example as clean text cards.

CTA

Comment a term you want explained next.

PERSONAL BRAND & STORYTELLING

SCRIPT 06 · The lesson I learned

Suggested length: 40–55 sec **Purpose:** Turn a real experience into a useful lesson.

SPOKEN SCRIPT

I learned something important while [real situation]. At first, I thought [old belief]. Then [what happened]. It made me realise [lesson]. Now I [new approach]. If you face something similar, start with [helpful step].

VISUAL / EDITING DIRECTION

Direct-to-camera opening; add relevant behind-the-scenes clips.

CTA

What experience taught you a lesson like this?

SCRIPT 07 · Why I started

Suggested length: 35–50 sec **Purpose:** Explain the reason behind your work or channel.

SPOKEN SCRIPT

I started creating around [topic] because [genuine reason]. I noticed [audience problem]. I wanted to use my experience in [skill] to help people [outcome]. I am still learning, and this page is where I share useful lessons and honest progress.

VISUAL / EDITING DIRECTION

Mix face-to-camera footage, workspace shots and examples of your work.

CTA

Follow if this is the kind of content you need.

SCRIPT 08 · Behind the finished result

Suggested length: 30–45 sec **Purpose:** Reveal the thinking behind a project.

SPOKEN SCRIPT

You are seeing the finished [project], but here is what went into it. I started with [brief]. The biggest decision was [decision]. I changed [element] because [reason]. After [process], this was the result. The lesson: [lesson].

VISUAL / EDITING DIRECTION

Start with the final result, then show planning and work-in-progress.

CTA

Which part of the process should I show next?

SCRIPT 09 · A belief I changed

Suggested length: 35–50 sec **Purpose:** Show growth through a changed opinion.

SPOKEN SCRIPT

I used to believe [old belief] about [topic]. I thought that because [reason]. But after [experience or evidence], I changed my mind. I now think [updated view], especially when [context]. The important distinction is [balanced takeaway].

VISUAL / EDITING DIRECTION

Place the old and updated belief side by side on screen.

CTA

Has your view on this changed?

SCRIPT 10 · A realistic workday

Suggested length: 30–45 sec **Purpose:** Show a creator routine honestly.

SPOKEN SCRIPT

Here is a realistic look at how I work on [project]. First, I [task]. Then I [task]. I make time for [important activity], and today I adjusted because [real obstacle]. The goal is not a perfect routine; it is a process I can repeat.

VISUAL / EDITING DIRECTION

Use short clips of planning, creating, editing and reviewing.

CTA

Would you like more behind-the-scenes videos?

TOOLS & WORKFLOWS

SCRIPT 11 · One tool, one job

Suggested length: 35–50 sec **Purpose:** Demonstrate one use case for a tool.

SPOKEN SCRIPT

This is [tool]. Let me show you one job it can help with: [task]. I start by [step one], then [step two], and finally [step three]. Here is the output. Check [limitation or quality point] before using the result.

VISUAL / EDITING DIRECTION

Screen-record the interface and zoom in on only the required controls.

CTA

Save this workflow and test it with your own project.

SCRIPT 12 · Before you download

Suggested length: 30–45 sec **Purpose:** Help viewers evaluate a tool responsibly.

SPOKEN SCRIPT

Before you download [tool], ask three questions. Does it solve [need]? Does the current plan include [required feature]? What happens to your [data or files]? Check the terms, test it with a low-risk task, and decide whether it fits your workflow.

VISUAL / EDITING DIRECTION

Show the tool name and three evaluation questions.

CTA

What tool should I review next?

SCRIPT 13 · Screen-recorded transformation

Suggested length: 30–45 sec **Purpose:** Show a real transformation from input to output.

SPOKEN SCRIPT

Let us turn [starting material] into [finished result]. First, I [action]. Next, I adjust [element]. Then I check [quality factor]. Here is the final version. Notice [specific improvement]—that is the change I wanted.

VISUAL / EDITING DIRECTION

Use a readable screen recording and label the key changes.

CTA

Would you like the exact steps in a follow-up?

SCRIPT 14 · My repeatable workflow

Suggested length: 40–55 sec **Purpose:** Share a process that reduces friction.

SPOKEN SCRIPT

When I need to [recurring task], I follow this workflow. I capture [input], organise it in [system], complete [main action], then review [quality checks]. This helps me avoid [friction]. It is one approach you can adapt.

VISUAL / EDITING DIRECTION

Show each stage as a labelled clip; hide private information.

CTA

Save this and adapt it to your workflow.

SCRIPT 15 · Three features to test

Suggested length: 35–50 sec **Purpose:** Introduce useful features with real use cases.

SPOKEN SCRIPT

If you use [tool], here are three features worth testing. [Feature one] can help with [use]. [Feature two] is useful when [use]. [Feature three] may help with [use]. Availability can depend on your plan or version, so check your app.

VISUAL / EDITING DIRECTION

Demonstrate each feature briefly and label plan limitations.

CTA

Which feature should I demonstrate properly?

ENGAGEMENT & COMMUNITY

SCRIPT 16 · Ask the audience

Suggested length: 20–30 sec **Purpose:** Invite useful audience input.

SPOKEN SCRIPT

I want to make more useful content about [topic]. Which is harder for you right now: [option A] or [option B]? Tell me where you get stuck, not just which one you choose. I will use your answers to plan a tutorial.

VISUAL / EDITING DIRECTION

Show both options on screen and pause for viewers to read.

CTA

Comment A or B and explain your situation.

SCRIPT 17 · Reply to a comment

Suggested length: 25–40 sec **Purpose:** Turn a genuine question into a useful answer.

SPOKEN SCRIPT

I saw this question: [question]. The short answer is [answer]. Here is why: [explanation]. For example, [example]. If you are in [situation], your next step should be [action].

VISUAL / EDITING DIRECTION

Show the comment only with permission or remove identifying details.

CTA

Leave your next question for a future video.

SCRIPT 18 · Beginner encouragement

Suggested length: 30–40 sec **Purpose:** Encourage practical action without unrealistic promises.

SPOKEN SCRIPT

If you are just starting [skill], do not compare your first attempt with someone's tenth year. Pick one small project, practise [specific skill], review what needs work, and repeat. You do not need expensive equipment to learn the basics. You need a clear next step and honest practice.

VISUAL / EDITING DIRECTION

Use warm direct-to-camera delivery and clips of practice.

CTA

Send this to someone who is beginning.

SCRIPT 19 · Choose the next tutorial

Suggested length: 20–30 sec **Purpose:** Let the audience help shape future content.

SPOKEN SCRIPT

I can make the next tutorial about [topic A], [topic B] or [topic C]. Which would help you most? Tell me what you want to be able to do by the end. I will use your answers to shape the lesson.

VISUAL / EDITING DIRECTION

Display three clear options; use a platform poll if available.

CTA

Vote and tell me the outcome you want.

SCRIPT 20 · Correct a misconception

Suggested length: 35–50 sec **Purpose:** Correct an inaccurate claim respectfully.

SPOKEN SCRIPT

I have seen people say [claim] about [topic]. There is a point worth discussing, but it leaves out [context]. A more accurate way to look at it is [balanced explanation]. The answer can depend on [conditions]. Here is what I would check first.

VISUAL / EDITING DIRECTION

Present the claim fairly, then show evidence or an example.

CTA

What context would you add?

PRODUCT, SERVICE & CONVERSION

SCRIPT 21 · Explain your offer

Suggested length: 35–50 sec **Purpose:** Describe an offer and who it is for.

SPOKEN SCRIPT

If you are [audience] and need help with [problem], I created [offer]. It includes [components] and is designed to help you [realistic outcome]. It may suit you if [fit], but may not be right if [not-fit]. Here is where you can review the details.

VISUAL / EDITING DIRECTION

Show the product, its contents and one use example.

CTA

Review the details through the link in my bio.

SCRIPT 22 · Show what is inside

Suggested length: 30–45 sec **Purpose:** Make a digital product tangible.

SPOKEN SCRIPT

Let me show you what is inside [product]. First, [component] helps with [use]. Next, [component] supports [use]. You also get [component]. Here is how the pieces work together: [workflow]. The aim is to make [task] easier to approach.

VISUAL / EDITING DIRECTION

Record a clean walkthrough; zoom into pages or templates.

CTA

View the full contents before deciding.

SCRIPT 23 · Answer the price question

Suggested length: 30–45 sec **Purpose:** Explain price transparently.

SPOKEN SCRIPT

A common question is why [offer] costs [price]. The price reflects [real deliverables, time, support or licensing]. It is designed for [audience] who need [specific use]. If it is outside your budget, [free or lower-cost next step] is a sensible place to start.

VISUAL / EDITING DIRECTION

Show the actual deliverables and explain them plainly.

CTA

Read the offer details and decide whether it fits.

SCRIPT 24 · Invite people to a free resource

Suggested length: 25–40 sec **Purpose:** Promote a genuinely useful free resource.

SPOKEN SCRIPT

If you are trying to [goal], I made a free [resource] to help you get started. It covers [contents] and is useful if you are at [stage]. It will not do the work for you, but it can help organise your next steps. Access it at [location].

VISUAL / EDITING DIRECTION

Show the cover and a few inside pages; make the access route clear.

CTA

Get the free resource through the link in my bio.

SCRIPT 25 · Give one clear next step

Suggested length: 25–40 sec **Purpose:** Guide interested viewers toward one action.

SPOKEN SCRIPT

You have seen how [approach] works. If you want to apply it to [situation], the next step is [action]. You can [download, book, message or visit] through [route]. Before you do, check [condition, price or eligibility]. Choose what fits your needs.

VISUAL / EDITING DIRECTION

Use a calm close and one on-screen action.

CTA

Take the next step through [specific link or action].

NICHE ADAPTATION

SCRIPT 26 · For designers: design breakdown

Suggested length: 35–50 sec **Purpose:** Explain the decisions behind a design.

SPOKEN SCRIPT

Here is why I designed [project] this way. The brief was [brief]. I chose [layout, type or colour decision] because [reason]. I prioritised [hierarchy or readability]. The final design needs to do more than look good—it needs to communicate [message].

VISUAL / EDITING DIRECTION

Show the design at full view, then zoom into hierarchy, typography and details.

CTA

What design decision should I break down next?

SCRIPT 27 · For tech creators: explain a feature

Suggested length: 30–45 sec **Purpose:** Make a technology feature understandable.

SPOKEN SCRIPT

You have probably seen [feature]. Here is what it actually does. It helps [function] when [use case]. For example, [simple demonstration]. It does not automatically [limitation]. Knowing that difference helps you decide when to use it.

VISUAL / EDITING DIRECTION

Show the feature in action and add labels for benefit and limitation.

CTA

Follow for more technology explained simply.

SCRIPT 28 · For cybersecurity learners: safe concept

Suggested length: 35–50 sec **Purpose:** Explain a defensive cybersecurity concept safely.

SPOKEN SCRIPT

Let's understand [security concept]. In simple terms, it means [definition]. A common example is [benign example]. The risk it helps address is [risk]. In a legal practice lab, you can learn the concept by [safe, authorised activity]. Only test systems you own or have permission to assess.

VISUAL / EDITING DIRECTION

Use a simple diagram or isolated lab demonstration; never expose real credentials.

CTA

Save this and tell me which defensive concept to explain next.

SCRIPT 29 · For small businesses: customer question

Suggested length: 30–45 sec **Purpose:** Create content that answers buyer questions.

SPOKEN SCRIPT

Before someone buys [product or service], they often want to know [question]. Here is the answer: [clear answer]. You should also know [important detail such as sizing, delivery, materials or process]. If you need [specific help], here is how to reach us.

VISUAL / EDITING DIRECTION

Show the product or service clearly; include accurate details and ordering instructions.

CTA

Send us [keyword] or use the order link for details.

SCRIPT 30 · For educators: teach with an example

Suggested length: 35–50 sec **Purpose:** Turn an abstract lesson into a memorable example.

SPOKEN SCRIPT

Today we are learning [topic]. Imagine [simple scenario]. In that situation, [concept] works like [analogy]. The key steps are [steps]. Now try this: [small practice question]. If you can explain why the answer works, you are building understanding.

VISUAL / EDITING DIRECTION

Use a whiteboard, simple props or animated labels; reveal the practice question at the end.

CTA

Comment your answer and explain your reasoning.

Make each script sound like you

Before recording, personalise at least three things: **Specificity:** replace generic phrases with a real example from your niche. **Credibility:** use your own experience, a demonstration or a reliable source. **Voice:** change words and sentence rhythm so the script sounds natural when spoken aloud.

A practical shot list

Shot	Use it for	Production note
Direct-to-camera	Hooks, opinions, stories and explanations	Look into the lens; deliver the first line with energy but not forced urgency.
Screen recording	Tool demos, walkthroughs and workflows	Hide personal data; zoom in; keep cursor movement deliberate.
Close-up / detail	Products, design, hands-on processes	Show the detail that supports the spoken point.
B-roll	Context, transitions and storytelling	Use footage that adds information rather than random decoration.
On-screen text	Key terms, steps and takeaways	Keep text concise, high contrast and inside platform-safe areas.

Pre-publish quality check

- ■ The first line makes the topic and audience clear.
- ■ The script delivers on the promise made by the hook.
- ■ Factual, technical, health, financial or safety claims have been checked against reliable sources.
- ■ Examples, screenshots, testimonials and client materials are used with appropriate permission.
- ■ Captions are readable and the audio is clear.
- ■ The CTA asks for one relevant next action.
- ■ The video does not rely on fabricated urgency, results or personal experience.
