AUSAD CREATIVES

100 VIRAL HOOKS LIBRARY

Attention-grabbing opening lines for creators who want to earn the next second of attention.

CREATOR GROWTH KIT · ASSET 04

10 hook categories · 100 adaptable opening lines · practical usage framework

How to use this library

A hook is the opening line, visual or moment that gives someone a reason to keep watching, reading or listening. A strong hook creates relevance and curiosity, then the content must deliver on that promise. No hook can guarantee virality.

The 4-part hook formula

Audience: Who is this for? **Problem or desire:** What matters to them? **Angle:** What makes this worth attention? **Payoff:** What will they learn, see or understand?

Customise the placeholders

Replace bracketed text such as [topic], [specific result] or [tool] with details from your niche. Be concrete. “Grow your account” is broad; “write a clearer first line for your next tutorial” gives the viewer a more specific reason to stay.

Match the hook to the content

Use curiosity for a reveal, problem hooks for a practical solution, story hooks for personal experience, and conversion hooks when you are clearly explaining an offer. Do not use a dramatic claim if the content cannot support it.

The 100 hooks

Curiosity & Open Loops

001

Most people overlook this one detail about [topic]—and it changes everything.

002

What if the reason [desired result] feels difficult is not what you think?

003

Before you spend another minute on [task], watch this.

004

There is a much simpler way to understand [complicated topic].

005

I tested [method/tool] so you can see whether it is actually worth your time.

006

Nobody explained this part of [topic] when I was starting out.

007

Here is what happens when you stop doing [common habit] and try [alternative].

008

One small detail in [process] can make the whole result look different.

009

If you have ever wondered why [problem] keeps happening, start here.

010

The surprising part of [topic] is not [obvious thing]—it is [less obvious insight].

Problem & Pain-Point Hooks

011

Still struggling with [specific problem]? Try looking at this first.

012

If [task] takes you hours, this workflow may help you simplify it.

013

Your [content/profile/workflow] may be confusing people for one simple reason.

014

Are you making this common [niche] mistake without realising it?

015

If you keep getting [undesired outcome], check these three things.

016

You do not need more [resource] yet; you may need a clearer process.

017

Here is why your [post/project/result] is not communicating what you intended.

018

Stop guessing your way through [task]. Use this simple checklist instead.

019

If you are overwhelmed by [challenge], focus on this one next step.

020

One reason beginners get stuck with [topic] is that they try to do everything at once.

Tutorial & How-To Hooks

021

Let me show you how to [specific result] in [number] simple steps.

022

Here is a beginner-friendly way to [task] without overcomplicating it.

023

Watch me turn [starting point] into [finished result].

024

Use this quick process the next time you need to [task].

025

Here is exactly where to start if you want to learn [skill].

026

Follow along: we are going to [task] from start to finish.

027

Three steps can make [process] much easier to manage.

028

Let me break [technical topic] down into an example you can actually use.

029

Here is a practical shortcut for [task]—and when not to use it.

030

Save this workflow for the next time you need to [specific action].

Myth-Busting & Contrarian Hooks

031

You do not need [popular assumption] to get started with [goal].

032

Let's challenge one piece of advice that gets repeated in [niche].

033

More [effort/tool/content] does not automatically mean better [result].

034

Here is the difference between a popular [niche] tip and useful advice.

035

Not every [trend/tool/strategy] deserves your attention. Here is how I decide.

036

The problem is not always [common explanation]. Sometimes it is [alternative].

037

Can we stop treating [misconception] as a universal rule?

038

An honest take: [common practice] works in some situations, but not all.

039

Before you copy that [trend/strategy], consider this trade-off.

040

One thing I would change about the usual advice on [topic] is this.

Storytelling & Personal Brand Hooks

041

I used to approach [topic] this way. Then one experience changed my thinking.

042

This project taught me something I did not expect about [skill/business].

043

Here is the moment I realised I needed a better system for [task].

044

I made this mistake when I started [journey], so learn from it.

045

Behind this finished result is a process most people never see.

046

This is what I wish I understood before I started [skill/project].

047

Let me tell you why I chose to focus on [specific niche or goal].

048

The biggest lesson from my latest [project/experiment] was not the result.

049

I nearly overlooked [important detail] while working on this.

050

Here is one honest thing I am still learning about [topic].

Lists, Comparisons & Checklists

051

Five things I check before I publish [type of content].

052

[Option A] vs [Option B]: which one makes sense for your situation?

053

Three tools I would compare before choosing a [tool/service].

054

Use this checklist before you spend money on [purchase or service].

055

Here are four signs your [profile/workflow/offer] needs a refresh.

056

Three ways to approach [task]—and the trade-off of each.

057

Do these [number] things before you call your [project] finished.

058

Beginner, intermediate or advanced? Here is how to choose your next step in [topic].

059

These are the details I compare when evaluating [options].

060

One-page checklist: what to prepare before [important action].

Results, Proof & Case-Study Hooks

061

Here is the process behind this [project/result]—not just the final screenshot.

062

Let's break down what changed between version one and version two.

063

I reviewed [number] examples and noticed this recurring pattern.

064

This is a real example of how [principle] can improve [process].

065

Here is what the data from my latest [test/campaign] actually tells me.

066

Watch the transformation from [starting point] to [finished output].

067

One experiment, one result, and three lessons worth keeping.

068

Here is how I approached [challenge] with the resources I had.

069

Let us analyse why this [design/post/workflow] communicates clearly.

070

The outcome matters, but the decisions behind it matter too.

Engagement & Community Hooks

071

Which part of [topic] do you find most difficult right now?

072

If I made one detailed tutorial for you, what should it cover?

073

Choose one: [option A] or [option B]—and tell me why.

074

What is one question about [topic] you have been hesitant to ask?

075

Creators: what is taking up most of your time this week?

076

Finish this sentence: I would be more consistent if I could [challenge].

077

Should I break down the process or share the finished template first?

078

What is one tool you use regularly that more people should know about?

079

Tell me your current level with [topic] and I will suggest a starting point.

080

Which of these examples should I improve in a follow-up post?

Offer, Product & Conversion Hooks

081

If you want to [goal], here is what this [resource/product/service] is designed to help you do.

082

I built this resource for people who are tired of starting from a blank page.

083

Before you buy another [tool/resource], check whether you actually need this.

084

Here is what is included in [offer] and who will benefit most from it.

085

If you are at [stage], this simple resource may help you take the next step.

086

Let me show you how to use [product/template] to complete one real task.

087

This is not a magic shortcut; it is a practical system for [specific outcome].

088

Here is who this [offer] is for—and who should probably skip it.

089

Want the exact framework I use to organise [task]? I put it into one resource.

090

If [specific problem] is slowing you down, take a look at this step-by-step resource.

Niche-Specific & Timely Hooks

091

AI creators: here is one way to make your workflow more intentional, not just faster.

092

Designers: before you add another effect, check whether the layout communicates clearly.

093

Tech beginners: let me explain [technical term] using a simple everyday example.

094

Cybersecurity learners: here is a safe lab concept that helps explain [security topic].

095

Small business owners: your content should answer the questions customers ask before buying.

096

Freelancers: make your offer easier to understand with this one change.

097

Fashion creators: show the fit, fabric and details your audience needs to make a decision.

098

Educators: turn one difficult concept into a simple example your learners can remember.

099

Food creators: show the detail that makes someone imagine the first bite.

100

Local brands: make it easy for nearby customers to understand what you sell and how to order.

Turn a hook into a complete post

Use this quick structure to move from attention to value. Keep one main idea per post and make the delivery as strong as the opening.

Stage	What to do	Example prompt to yourself
1. Hook	Earn attention with a specific opening.	What would make my intended viewer pause?
2. Context	Make the relevance clear.	Who is this for, and why does it matter now?
3. Value	Teach, demonstrate, compare or tell the story.	What useful detail can I prove or show?
4. Payoff	Deliver the answer promised by the hook.	What should the viewer understand by the end?
5. CTA	Ask for one relevant next action.	Should they save, comment, share, follow or click?

Five checks before publishing

■ Does the hook speak to a recognisable audience or situation?

■ Can the content deliver exactly what the hook promises?

■ Is the wording clear when heard once or read quickly?

■ Have I removed exaggerated, misleading or unsupported claims?

■ Does the CTA fit the goal of this specific post?

A simple hook testing method

For a topic you plan to publish more than once, test two different opening angles while keeping the core lesson and audience similar. Compare retention, watch time, saves, shares and meaningful responses—not views alone. Record the platform, date, format and audience context. A small test is a clue, not definitive proof.

Responsible use

Adapt these hooks into your own voice. Do not fabricate personal stories, testimonials, statistics, urgency or results. Credit sources where needed, respect privacy and permissions, and check facts before publishing educational or technical claims.

AUSAD CREATIVES

Create with intention. Communicate with clarity. Earn attention with value.
